

MARINE FIXTURES

Ultra-harsh marine and petro-chemical environments require lighting products that can withstand extreme temperatures, hazardous environments, corrosive salt-water areas, as well as shock and vibration. Phoenix has provided durable indoor and outdoor fluorescent light fixtures, heavy-duty floodlights, hull perimeter security floodlights, and searchlights that can be found above and below decks and in many marine environments including oil rigs, Navy combat ships, research vessels, off-shore supply vessels and container ships.

PHOENIX[®]
Durability by Design

LFW Series Snaplight[®]
Wet-listed, non-metallic surface-mount indoor/outdoor two-lamp fluorescent in 2' or 4' lengths. Up to 32W

LFSB/LFSD Series Snaplight[®]
Marine-rated, surface-mount fluorescent in 2' or 4' lengths for moderate vibration resistance. Up to three lamps. Up to 60W. LFSD: for hazardous locations

LFX, LFXR & LFXB Series
Marine-rated, "explosion-proof" fluorescents. Class I, II, & III; Div. 1 & 2 certifications available. In 2' or 4' lengths. Up to four lamps. Up to 60W

LFNR Series
Class 1, Div. 2 hazardous- and marine-rated two-lamp fluorescent available in 2' or 4' versions. Up to 60W

LFV7 Series
Wet-listed, hazardous-rated fluorescent with steel housing. Up to three lamps. Up to 60W

LFL Series
Low-profile, two-lamp fluorescent fixture ideal for applications where space is limited. Up to 40W

LFB Series
Marine-rated berth/mirror fluorescent with switch and convenience outlet. Up to two lamps. 15W

IBM Series
Marine-rated, incandescent berth/mirror fixture with switch and convenience outlet. Up to 60W

LFBM Series
Compact, marine-rated berth/mirror fluorescent with switch and convenience outlet. Up to two lamps. 8W

LFCN Series
Marine-rated, corner-mounted ceiling/passageway fluorescent. Up to three lamps. Up to 55W

LFT & LFMC Series
Marine-rated, recessed fluorescents. Up to 40W
LFT: For T-bar ceilings. Up to 4 lamps
LFMC: For modular type ceiling systems (pictured). Up to 2 lamps

LFR Series
Marine-rated, recessed fluorescent. Up to four lamps. Up to 40W

RDL Series
Marine-rated compact fluorescent recessed downlight. Up to 32W

MARINE FIXTURES

PHOENIX[®]

Durability by Design

“Marine-rated” means a fixture is sufficiently resistant to corrosion and water ingress to be UL Listed for use in marine applications.

MRSE Series
Heavy-duty, hazardous- & marine-rated, externally ballasted HID floodlight for harshest environments. Up to 1500W

TL Series
Tough, lightweight, externally ballasted floodlight; wet listed. Up to 1000W

BLST Series
Hazardous- and marine-rated indoor/outdoor ballasts for lamps to 1500W

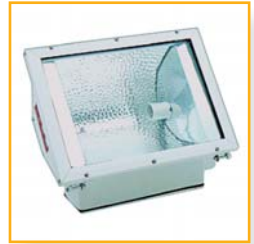

MRS Series
Super-rough service, marine-rated floodlight with lamp isolation diaphragm. Up to 1000W PAR64 lamp

MF Series
Marine-rated, integrally ballasted, stainless steel HID floodlight. Up to 400W

MS Quartz Series
Marine-rated & wet-listed quartz halogen floodlight with various beam patterns. Up to 1000W

MS HID Series
Hazardous- and marine-rated, integrally ballasted HID floodlight. Up to 150W

MS 250-400-1000 Series
Hazardous- and marine-rated, heavy-duty, and integrally ballasted HID floodlight. Up to 1000W

MSD Series
Marine-rated, integrally ballasted HID floodlight w/ bat-wing beam pattern. Up to 400W (Hazardous options available) (MSD Quad Volt Series pictured)

MSR Series
Marine-rated, HID floodlight with external ballast included, bat-wing beam pattern. 400W and 1000W

SLX Series (Stationary or Portable)
Marine-rated, explosion-proof, incandescent or integrally ballasted HID floodlight
SLX: Stationary; SLXP: Portable

WT Series (Stationary or Portable)
Wet-listed, halogen incandescent floodlight with shock-mount or tripod base. Up to 500W

MFC Series Floodlight
Marine-rated as halogen incandescent. Incandescent up to 500W

Searchlights
Halogen/incandescent searchlights for marine use, hazardous-rated options available

MS 120/1500 LBM
Marine-rated, externally ballasted HID, precision flood/searchlight with nearly two million peak beam candlepower.

VP Series
Non-metallic vaporproof light with hazardous location and multiple mounting options available. Incandescent up to 150W
Compact fluorescent up to 42W
HID up to 100W

Brass & Aluminum "Jelly Jars"
Marine-rated, incandescent jelly jars up to 150W, receptacles, and plugs.

 EISA Compliant Fixture. See specification sheet for additional information.
